Profile

Electronics and Communication Engineering graduate targeting entry-level IT support and junior Linux administration, with a continuing interest in software development. Uses Arch Linux as a personal desktop, maintains package settings, and checks dependencies with pactree. Builds web portfolio projects through an AI-assisted workflow, reviewing generated code and making manual interface and code changes.

Technical Skills

Linux and desktop support: Arch Linux, Omarchy, pacman update configuration, package and dependency review with pactree, command-line maintenance (foundational).
Web and project tools: React, TypeScript, Vite, Astro, Tailwind CSS, Supabase authentication prototype, Git, GitHub, responsive interface iteration, Three.js project familiarity.
ECE and embedded: Electronics and communication systems, computer networks, embedded systems, Arduino and digital logic (academic exposure), Android Automotive and CAN concepts (project exposure).
Programming foundations: HTML, CSS, JavaScript, TypeScript, Python, C/C++, and Verilog; exposure varies by coursework and project use.
Security and creative work: Network security fundamentals; music instruction and personal electronic music practice.

Recent Projects

S.M. English School Website | Personal project
Astro, Tailwind CSS, Supabase authentication prototype

- Built a responsive multi-page school website MVP covering home, academics, admissions, and updates.
- Added a Supabase sign-in prototype for the admin area; the authentication flow is a prototype, not a production service.
- Source: https://github.com/Zynxx777/sm-english-school-web

ZYNX Portfolio | Personal project
React, TypeScript, Vite, Three.js

- Maintains a multi-page portfolio with interactive project browsing, responsive layouts, and an interactive 3D room.
- Reviews AI-generated code and makes manual changes to layout, content, and interactions.
- Portfolio: https://zynx-portfolio.vercel.app/

Joshua D | Additional Background

Current Experience

Music Teacher (Part-time) | St Sophia Convent High School
Karnataka, India | August 2026 - Present

- Teach music to school students on a part-time schedule.

Linux & Desktop Support Practice

Arch Linux Workstation Maintenance | Personal practice
Arch Linux, pacman, pactree

- Reviewed pacman update configuration and investigated application update behavior on a personal Linux desktop.
- Used pactree to inspect package dependency relationships before considering cleanup.

Education

Bachelor of Engineering in Electronics & Communication Engineering | Don Bosco Institute of Technology
2021 - 2025 | CGPA: 7.16 / 10

- Relevant study: computer networks, embedded systems, VLSI and digital design, digital signal processing, telecommunications, and control systems.

Pre-University Course (PCMB Science) | Shanthiniketan PU College
2019 - 2021 | 71.6%

Academic Project Exposure

Automotive Cockpit Systems Project
ECE academic project exposure

- Studied Android Automotive OS, CAN bus, and embedded cockpit system concepts. Presented as academic project work, not professional employment.

MediVend Smart Dispenser Concept
ECE academic project exposure

- Academic concept related to introductory microcontroller work, digital logic, and electronics engineering.

Selected Training & Recognition

- 7chats Messenger bug bounty contest recognition (September 2021), recorded in existing resume materials for reporting an authentication issue.
- VLSI digital design and Verilog programming coursework (July 2024).
- Python programming basics coursework (July 2024).
- Network security coursework (February 2025).

Additional Interests

Music teaching and personal electronic music practice under the 7YNX alias. Interested in growing practical IT support and Linux administration experience while continuing to develop software skills.
